approx. 650 mm

Volume:

approx. 139 cm³

Weight:

approx. 198 grams

Activation altitude:

according to set MODE

Activation speed:

according to set MODE

Length, width, height of the processing unit:

approx. 85 x 43 x 32 mm

Length, width, height of the control unit:

approx. 65 x 18 x 6.5 mm

Length, diameter of the release unit:

approx. 43 x 8 mm

Cable length of the release unit (including release unit):

approx. 500 mm

Storage temperature:

+71° to -25° Celsius

Storage pressure:

200 to 1094 hPa (5.906 to 32.306 In.Hg)

Working temperature:

+63° to -20° Celsius*

Maximum allowable humidity:

up to 99.9 % rel. humidity

Waterproof:

up to 24 hours down to a depth of 8 feet (2.5 meters)

Dropzone offset adjustment limits:

±3000 feet or ±1000 m

Operating range below / above sea level:

-2140 feet to +26,000 feet (-650 m to +8000 m)

Functioning period:

14 hours from switch-on

Power supply:

service life warranty**

Maintenance:
