# Comp Velocity

## Opis produktu

Since the release of the PD Velocity in 1999, we have learned a lot about cross-braced canopies. While on the surface the Competition Velocity may look like a regular Velocity, it a completely different machine. With improved aerodynamics, better openings, more powerful rear risers, and better slow flight characteristics on the toggles, the Competition Velocity is like a Velocity on steroids. If you are looking for a step up in opening, flight, and landing performance from your current cross-braced canopy, the Competition Velocity is for you.

### Technical Information:

- Sizes 71, 75, 79, 84, 90, 96, 103, 111
- 7-cell crossbraced canopy
- All Zero Porosity (ZP) fabric
- Orange Vectran, HMA, or Vectran lines
- Collapsible channel slider and/or RDS slider

### Characteristics:

- Great openings
- Long recovery arc
- Very steep glide
- Great shut down power
- Responsive and powerful canopy

### Great for:

- Highly experienced canopy pilots
- First-time crossbraced canopy pilots

- Getting back from long spots
- Camera flyers
- Individuals learning high performance canopy piloting under appropriate supervision
- Individuals looking for a high performance canopy for competition
- Individuals looking for a step up from a non-crossbraced canopy, such as the Stiletto, Sabre2, or Katana

- **Velocity pilots** looking for:
    - Less vibration on opening
    - Better rear riser performance
    - Better slow flight performance on toggles
