Horizon

Opis produktu

After years of development, we are excited to introduce PD’s first wingsuit-specific canopy HORIZON. The Horizon is a low-bulk 7-cell main canopy designed to be an easy ‘off button’ to end your wingsuit flight with as little drama as possible. The emphasis for developing this canopy was on eliminating deployment problems caused by the burble of larger wingsuits, without sacrificing a great flare or responsive handling. In fact, we think the Horizon has the best stopping power of any canopy in its class. Best of all, the Horizon gives you the ability to upsize as many as two full sizes compared to a non-crossbraced ZP canopy main, meaning you can fit a larger canopy in your existing rig for wingsuit jumps. No need for a new container!
