R.A.G.E.

Producent	**Paratec**

Opis produktu

With the R.A.G.E. Paratec has been following an independent path for over 15 years, which has now reached a new dimension with the new R.A.G.E. 2 generation.
The ability to design three-dimensionally and make the transition to finished product requires a lot of experience and a keen awareness of manufacturing processes and precision.
It’s exclusive air handling system not only gives the R.A.G.E. a nose similar to that of an aircraft, but produces a convincing optimisation of performance on a Ram Air parachute without resorting to x-bracing.
For the most ambitious and experienced sport jumpers, the R.A.G.E. constitutes the perfect combination of performance and everyday practicality at the highest possible level below the x brace category of canopies.
